

Fragebogen

1 General_Instruction

Dear participant,

thank you very much for your participation in this experiment in which we investigate causal reasoning.

On the next screens, we will show a fictitious scenario that we use to investigate this issue.

Please take your time and make sure that you fully understand the scenario. This is important for us because we will later ask you to provide particular judgments. Please note that we are interested in your **intuitive decisions**.

Finally, please notice that your participation in this study is fully anonymous and that we guarantee that we do not collect any personal information. You can quit the study at any time by simply closing the browser window.

This research is conducted under the scientific direction of:

Dr. Simon Stephan

*Department of Cognitive and Decision Sciences,
University of Göttingen, Germany.*

Before you start, please:

- **maximize your browser window;**
- **switch off phone/e-mail/music & anything else distracting**
- **and please enter your Prolific ID [it can be found at the top of this webpage or when going to your account info]:**

This study works properly only on Desktop PCs and Laptops, and not on Smartphones or Tablets. Please confirm that you take part via Desktop PC or Laptop.

- I confirm that I take part via Desktop PC or Laptop.
- I do not confirm that I take part via Desktop PC or Laptop.

For the scientific utility of the results, it is very important that you provide complete and careful responses.

How seriously will you take your participation in the study?

- I confirm that I will take my participation in this study seriously.
- I confirm that I will not take my participation in this study seriously.

2.1.1.1 7_3_1

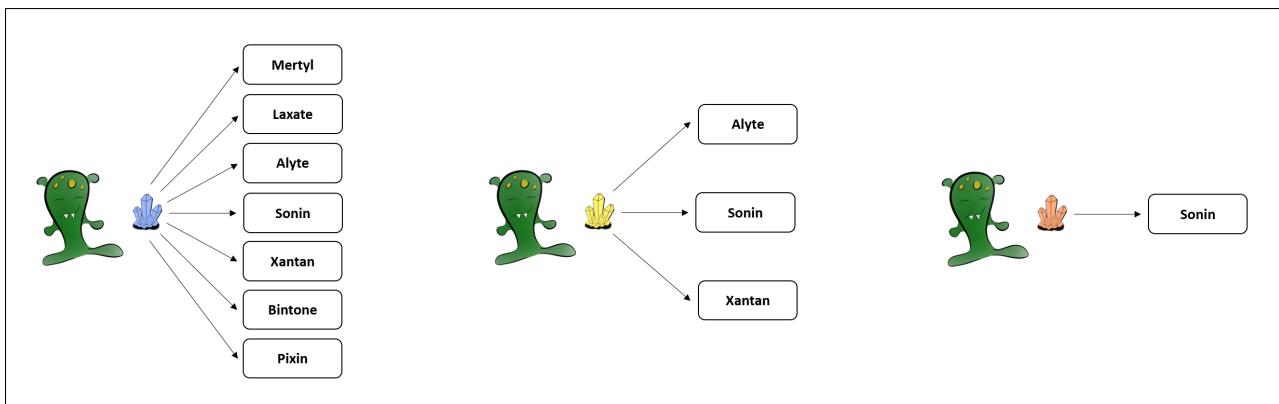

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.1.2.1 7_1_3

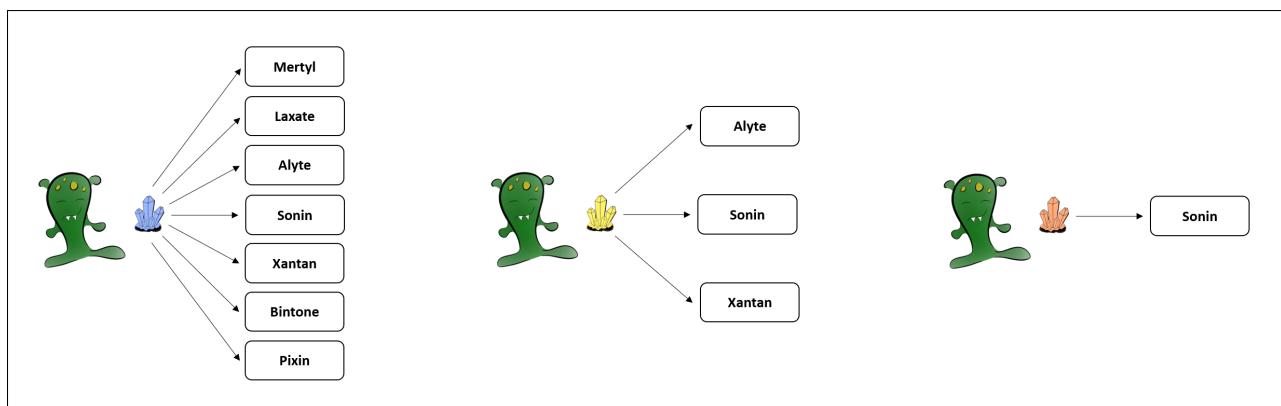

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.1.3.1 3_1_7

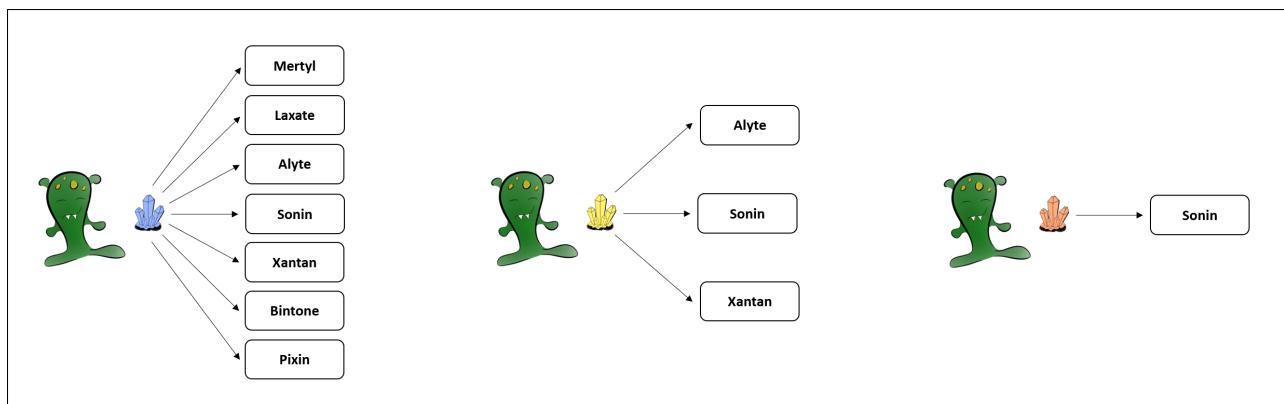

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.1.4.1 3_7_1

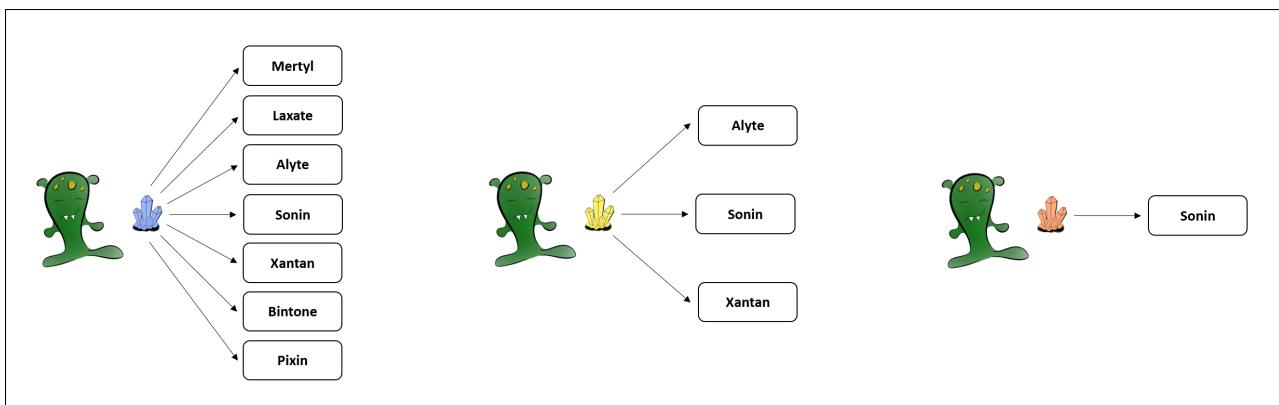

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.1.5.1 1_7_3

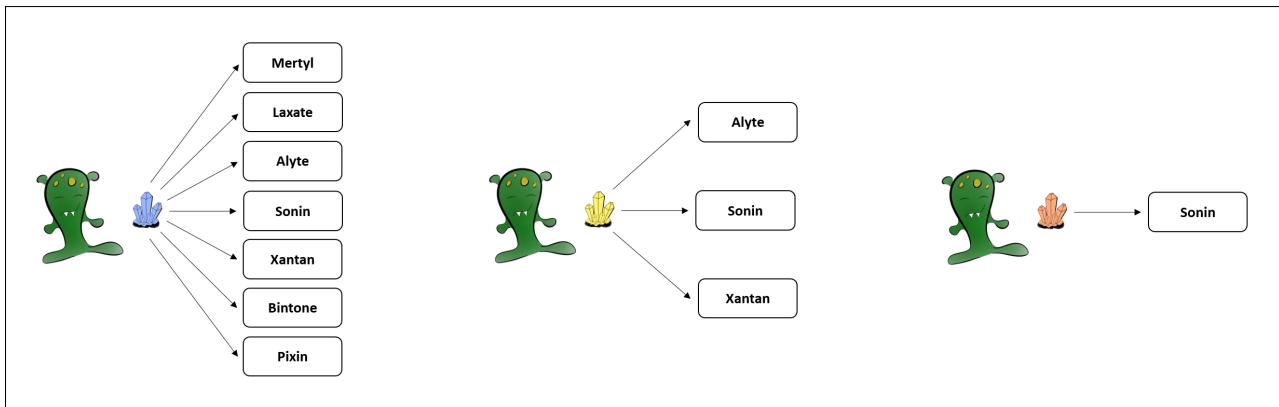

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.1.6.1 1_3_7

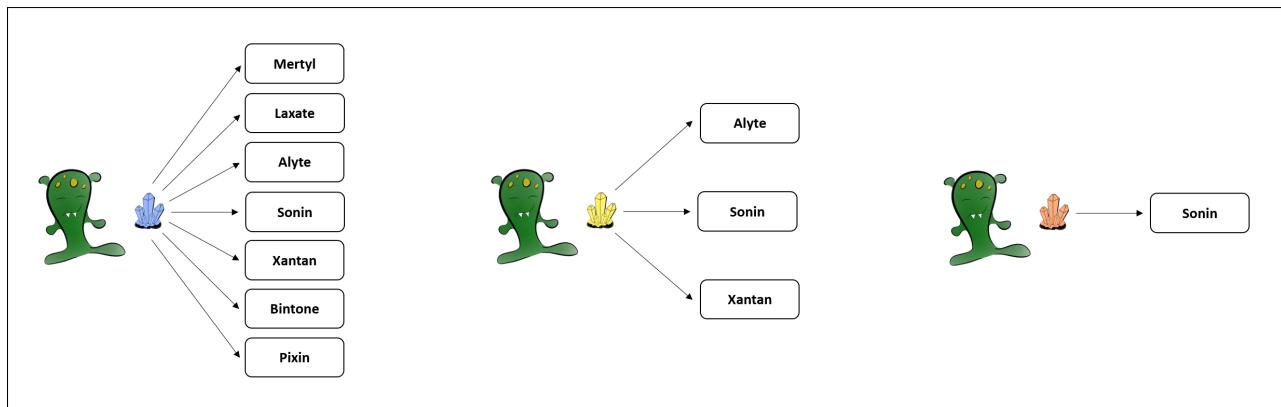

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.2.1.1 7_3_1

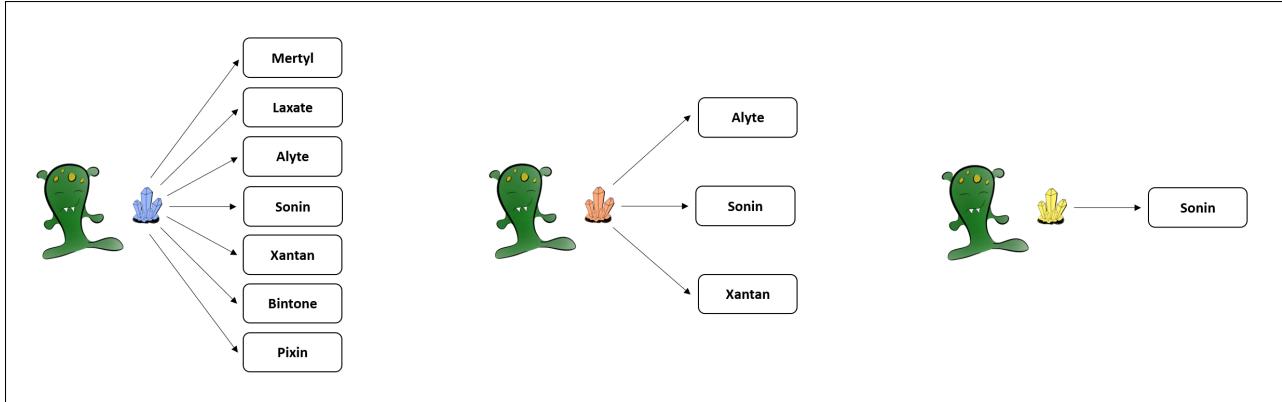

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, red, and yellow.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Yellow crystals possess the capacity to cause the body to produce a single healthy blood substance. Yellow crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.2.2.1 7_1_3

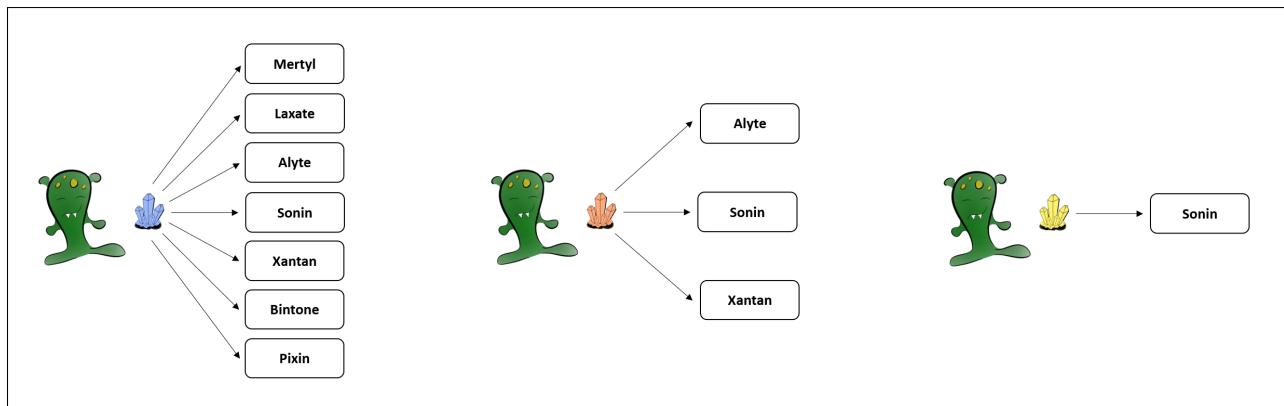

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, red, and yellow.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Yellow crystals possess the capacity to cause the body to produce a single healthy blood substance. Yellow crystals can cause the body to produce the blood substance Sonin.

Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, yellow, red, and blue.

Yellow crystals possess the capacity to cause the body to produce seven different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Blue crystals possess the capacity to cause the body to produce a single healthy blood substance. Blue crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.4.3.1 3_1_7

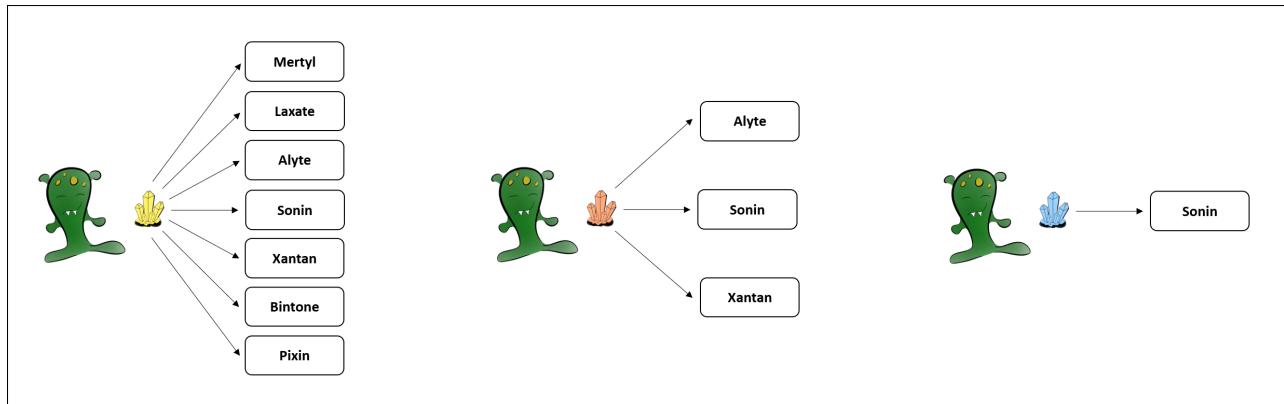

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, yellow, red, and blue.

Yellow crystals possess the capacity to cause the body to produce seven different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Blue crystals possess the capacity to cause the body to produce a single healthy blood substance. Blue crystals can cause the body to produce the blood substance Sonin.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

2.4.4.1 3_7_1

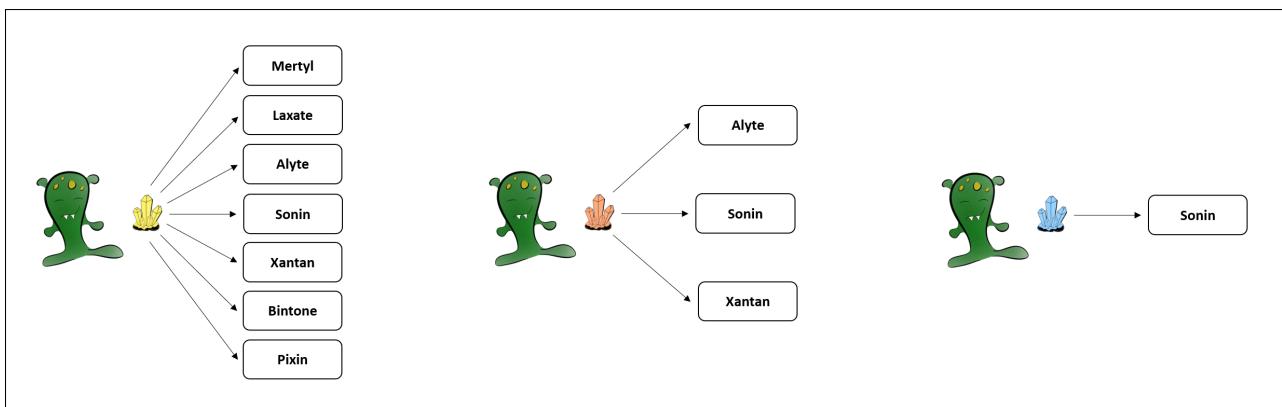

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, yellow, red, and blue.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain the exact same amount of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

3.1.5.1 1_7_3

Please read the following scenario:

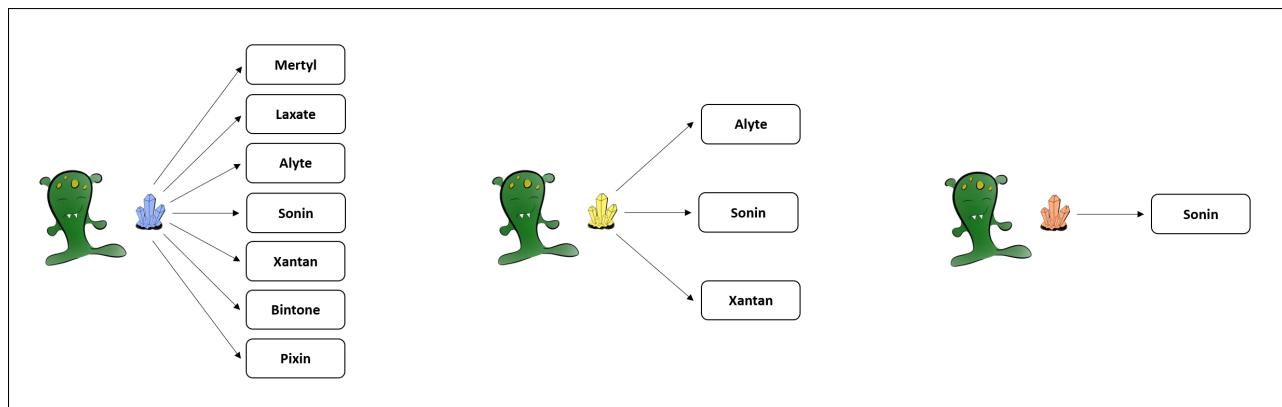

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain the exact same amount of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

3.1.6.1 1_3_7

Please read the following scenario:

3.4.5.1 1_7_3

Please read the following scenario:

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, yellow, red, and blue.

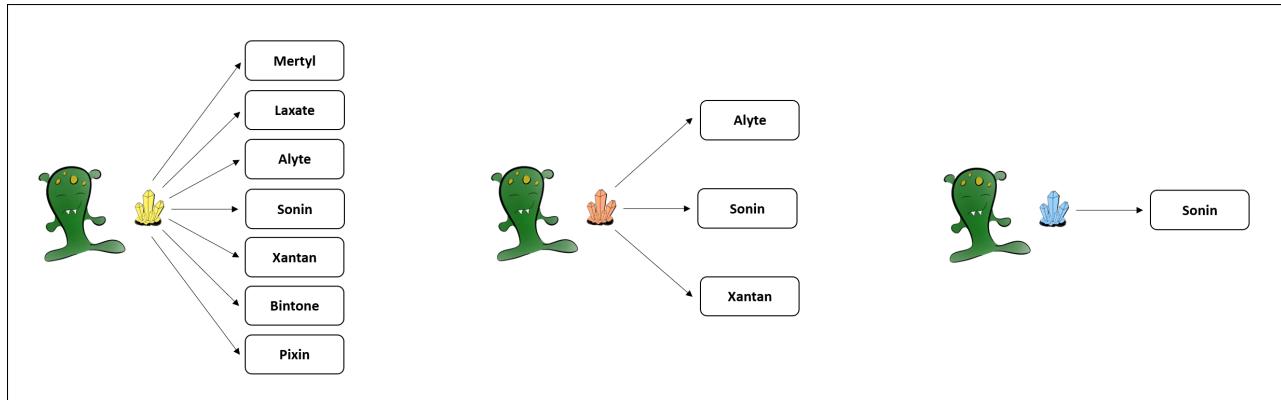

Yellow crystals possess the capacity to cause the body to produce seven different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Blue crystals possess the capacity to cause the body to produce a single healthy blood

substance. Blue crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain the exact same amount of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

4.1.6.1 1_3_7

Please read the following scenario:

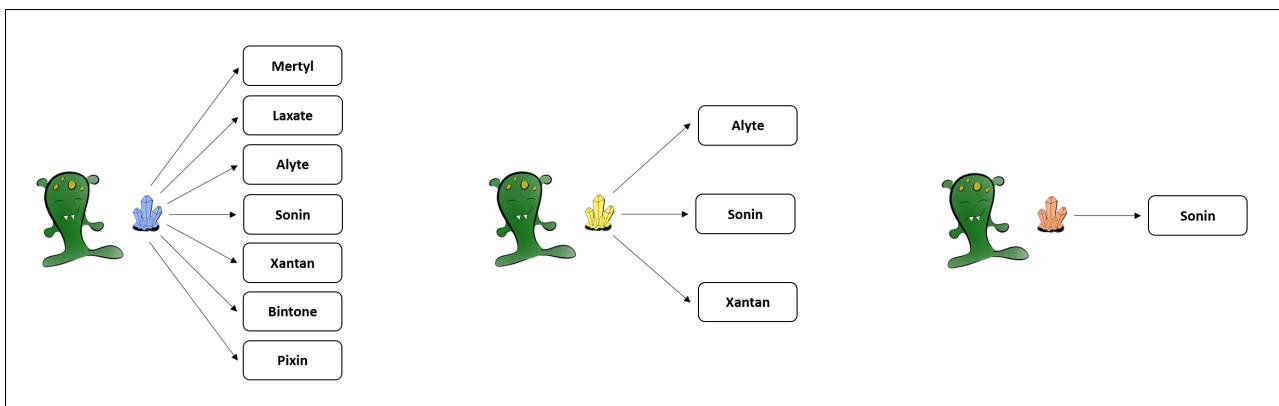

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, yellow, and red.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Yellow crystals possess the capacity to cause the body to produce three different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Red crystals possess the capacity to cause the body to produce a single healthy blood substance. Red crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain different amounts of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

4.2.1.1 7_3_1

Please read the following scenario:

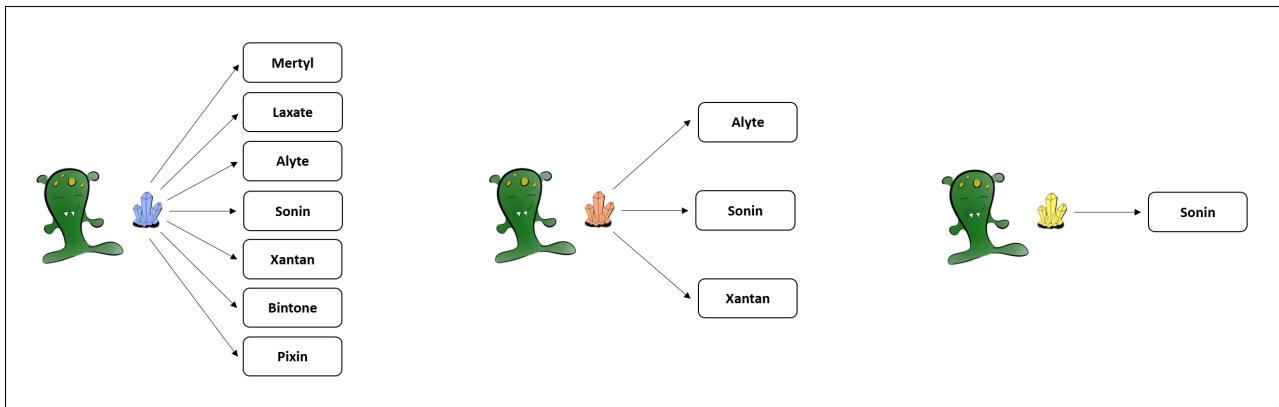

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, blue, red, and yellow.

Blue crystals possess the capacity to cause the body to produce seven different healthy blood substances. Blue crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Yellow crystals possess the capacity to cause the body to produce a single healthy blood substance. Yellow crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain different amounts of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

Yellow crystals possess the capacity to cause the body to produce seven different healthy blood substances. Yellow crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Red crystals possess the capacity to cause the body to produce three different healthy blood substances. Red crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Blue crystals possess the capacity to cause the body to produce a single healthy blood substance. Blue crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain different amounts of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

According to your intuition, if an alien eats a blue crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a red crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

According to your intuition, if an alien eats a yellow crystal, how strongly will this stimulate its body to produce the blood substance Sonin?

Please use the scale below to provide your answer.

4.5.1.1 7_3_1

Please read the following scenario:

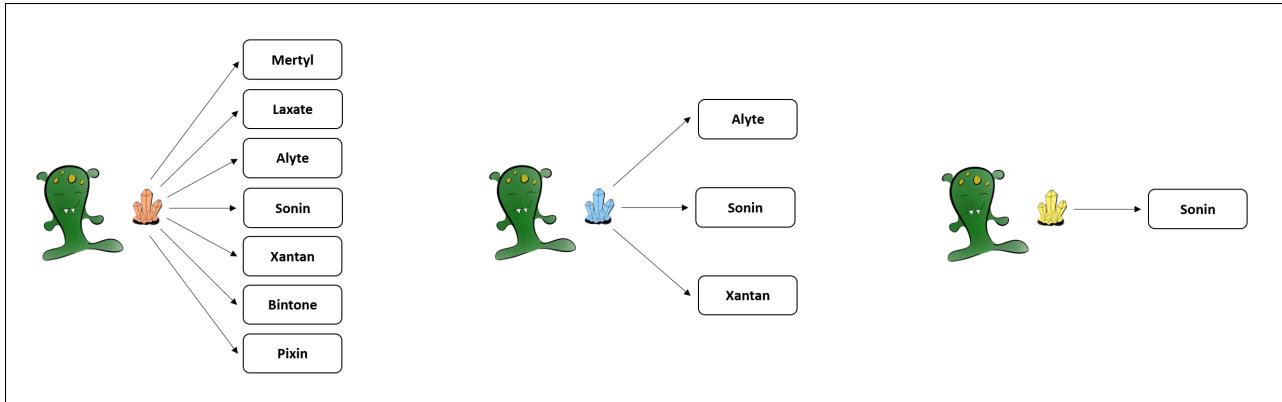

A remote planet of our galaxy is inhabited by tiny Aliens, called Morganians. The regular diet of Morganians consists of plants of different types. From time to time, however, Morganians feel the urge to seek and swallow sweet crystals, which can also lead to positive effects. There are three different types of crystals, red, blue, and yellow.

Red crystals possess the capacity to cause the body to produce seven different healthy blood substances. Red crystals can cause the body to produce the blood substances Mertyl, Laxate, Alyte, Sonin, Xantan, Bintone, and Pixin.

Blue crystals possess the capacity to cause the body to produce three different healthy blood substances. Blue crystals can cause the body to produce the blood substances Alyte, Sonin, and Xantan.

Yellow crystals possess the capacity to cause the body to produce a single healthy blood substance. Yellow crystals can cause the body to produce the blood substance Sonin.

The three types of crystals can lead to these positive effects because they contain a mineral called "Cryptophane". All three types of crystals contain different amounts of this mineral.

We now would like to get to know your intuition about the causal strength with which eating the different crystals causes the body to produce the blood substance Sonin. To express your intuition about the causal strength, please answer the following questions:

5.1 capacity_check

You've just learned about three different types of crystals. Based on what you can remember, what is true about the amount of Cryptophane in these three types of crystals?

- The three types of crystals contain different amounts of Cryptophane.
- The three types of crystals contain the same amount of Cryptophane.

6 Demographie

Thank you very much for your effort, you are almost done with the survey. Please provide the

following additional information:

Please indicate with which gender you identify.

- male
- female
- other
- prefer not to say

How old are you?

In the text field below you can report any errors that you came across during the study (e.g., technical issues, layout problems, spelling errors, errors in program logic and flow, etc.).

7 Endseite

Thank you for taking part in this study!

The aim of this experiment is to find out more about how people reason about causality. If you are interested in further details or if you have any questions or comments concerning the experiment, feel free to contact me (Simon Stephan) under sstepha1@uni-goettingen.de
